

INSTALLATION INSTRUCTIONS

Part Number YA-1002

This filter fits: SEE CATALOG FOR CURRENT APPLICATIONS

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N Filtercharger® seals properly.

INSTALLATION

1. Remove the stock air filter.
2. Carefully clean the inside of the air box.
3. Apply a thin layer of the provided K&N Sealing Grease to the perimeter of the K&N Filtercharger®.
4. Install the K&N Filtercharger® into the groove of the air box lid. (Fig. 1)

Note: The side marked "FRONT" will be facing towards the front of the motorcycle. (Fig. 2)

5. Carefully reinstall the air box lid onto the air box base. Make sure the K&N Filtercharger® is completely seated into the groove of the air box base. (Fig. 3)

CAUTION: If not properly installed the K&N Filtercharger® can be damaged and could allow unfiltered air into the intake.

6. Tighten the air box screws.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
